

MONGEZI ANDISWA MALULEKA

Platform Engineer | Software Developer

Durban, KwaZulu-Natal, South Africa | mongeziimaluleka@gmail.com | 081 512 3533 | LinkedIn: [mongezi-maluleka-813039189](#)

PROFESSIONAL SUMMARY

Platform Engineer and Software Developer with hands-on experience building enterprise digital onboarding platforms and internal support tools. Skilled in JavaScript, React, Node.js, Express.js, PostgreSQL, REST APIs, WSO2 API Manager, and cloud technologies. Experienced in KYC workflows, document management, role-based access control, audit logging, Agile delivery, troubleshooting, community technology outreach, mentorship, event operations, and stakeholder coordination.

CORE SKILLS

Languages	JavaScript, TypeScript, Python, Java, SQL, HTML5, CSS3
Frontend	React, responsive design, UI/UX principles, accessibility-focused interfaces
Backend & APIs	Node.js, Express.js, REST APIs, WSO2 API Manager, API integration, Ping OIDC, JWT, RBAC
Databases	PostgreSQL, SQL queries, relational data modelling, database relationships
Cloud & Delivery	AWS Certified Cloud Practitioner, AWS S3 concepts, Docker, Git, GitHub, Jira, Agile/Scrum, Postman, VS Code, draw.io
Leadership & Operations	Tech mentorship, learner facilitation, event registration workflows, stakeholder coordination, PR content

PROFESSIONAL EXPERIENCE

Platform Engineer | Old Mutual South Africa — Durban, KwaZulu-Natal | Nov 2025 - Present

- Contribute to the design, development, and support of enterprise digital platforms for customer and business onboarding.
- Build and enhance frontend interfaces using React and JavaScript, with focus on usability, accessibility, and clear user journeys.
- Develop backend services and REST APIs using Node.js and Express.js to support onboarding, dashboard, and internal operations workflows.
- Design and maintain PostgreSQL database structures, relationships, and queries for customer, business, document, and administrative modules.
- Support API integration and platform service communication using WSO2 API Manager and backend REST services.
- Implement KYC document upload and management logic, including document status visibility, filename tracking, and cloud storage integration concepts.
- Support admin and support-agent modules, including user management, role assignment, access restrictions, and audit logging for governance and traceability.
- Investigate and resolve frontend/backend issues such as data refresh problems, API mismatches, form submission bugs, and database relationship errors.
- Use Jira and Agile practices to track completed work, in-progress tasks, planned improvements, and cross-functional platform delivery.

Social Media Manager & Event Operations Assistant | Tech Horizons — Durban, South Africa | May 2026 - Present (Part-Time)

- Lead digital PR activities, social media coverage, team introduction content, executive updates, and event highlight posts for technology events and youth workshops.
- Manage participant and mentor registration, attendee check-ins, entrance logistics, and attendee flow during hackathons and workshops.
- Coordinate with organisers, speakers, mentors, and attendees to support smooth event delivery and a positive participant experience.
- Support initiatives including the KZN Tech Horizons Hackathon and Youth Entrepreneurship Workshop at the Moses Kotane Research Institute.

SELECTED PROJECTS

KYC Onboarding Platform — Node.js, Express, PostgreSQL, Ping OIDC, JWT, Docker, draw.io

Backend Developer (Sole Backend Developer)

- Designed and built a full KYC onboarding REST API from scratch in Node.js and Express as the sole backend developer, serving both customer-facing and admin-facing surfaces.
- Replaced self-registration and OTP authentication with Ping OIDC (Authorization Code Flow with PKCE) as the sole customer entry point, and implemented auto-provisioning of customer accounts from Ping-supplied identity claims (name, email, mobile, DOB, ID number, ID type, country) on first sign-in, with identity linking on subsequent sign-ins.
- Engineered the full KYC journey engine covering personal details, contact, residential and permanent address, next-of-kin, business profile, business address, beneficial owners and directors. Implemented a journey evaluation engine that determines blockers before submission and auto-advances journey status on document approval.
- Designed and implemented a document management system supporting upload, retrieval, replacement and soft-delete, with verification routing (identity documents to PENDING_VERIFICATION, all others to MANUAL_REVIEW_REQUIRED), related-person document linkage to beneficial owners and directors, and local filesystem storage behind an S3-ready interface.
- Built the full admin surface: a KYC reviewer workflow queue; document review with claim/release/assign/approve/reject/escalate actions; a support agent module for editing customer and business fields; role-based user management (SYSTEM_ADMIN, KYC_REVIEWER, SUPPORT_AGENT, SUPERVISOR, AUDIT_VIEWER); a structured audit trail; and announcements and ticket management.
- Implemented security controls including JWT token ownership (customerId always sourced from the token, never the request body), opaque 404s for absent-or-not-owned resources, structured logging with field-level redaction, request ID tracing, CORS configuration and rate limiting. Wrote and maintained a 253-test smoke suite covering all journey flows, document lifecycle, admin workflow, security and ownership checks, and produced full solution architecture documentation and draw.io diagrams.

OMAR Developer Portal — WSO2 API Manager, React, TypeScript, JavaScript, REST APIs

Frontend Developer

- Developed and implemented custom navigation components for the OMAR Developer Portal, including responsive menus, category-based navigation, API discovery workflows and active-state navigation styling.
- Collaborated on a complete UI overhaul that replaced the default WSO2 Developer Portal with a custom Old Mutual-branded Pan-African API Marketplace supporting multi-country API discovery and developer onboarding.
- Co-built a centralised API catalogue with advanced search, filtering and API categorisation, enabling developers to discover APIs by country, category and product domain across Banking, Insurance, Investments and Customer Onboarding.
- Co-developed developer onboarding experiences covering guided API subscription, application creation, key generation and environment management workflows.
- Re-established frontend-to-backend integrations following platform updates and architectural changes.
- Improved developer experience through enhanced usability, accessibility, responsive design and streamlined API discovery.

StokvelSmart AI - Innovation Hackathon — AI concepts, digital banking, financial wellness

- Contributed to an AI-powered digital stokvel platform concept focused on trust, transparency, financial guidance, and potential Old Mutual Bank ecosystem integration.
- Helped shape feature ideas for digital contributions, member visibility, governance, and AI-assisted financial education.

ClubConnect — HTML, CSS, JavaScript

- Co-developed a responsive website to showcase WeThinkCode_ student clubs, events, stories, videos, and community engagement content.
- Focused on accessibility, performance, SEO basics, and collaborative frontend development.

COMMUNITY & LEADERSHIP

Community Engagement & Capability Hub Contributor | Old Mutual Capability Hub

- Support Green Table Talk activities, question collection campaigns, and communication with Hubsters and journey leads.
- Contribute to knowledge sharing, collaboration, peer learning, and technical problem-solving across the Capability Hub community.

EDUCATION

WeThinkCode_ | NQF 5: Information Technology - Systems Development — 2022 - 2025

- Completed software engineering training across Python, Java, JavaScript, SQL, version control, collaborative development, and project-based learning.
- Built practical software projects while strengthening teamwork, adaptability, and problem-solving skills.

CERTIFICATIONS & TRAINING

- AWS Certified Cloud Practitioner - Amazon Web Services (AWS)
- AWS Cloud Fundamentals: compute, networking, identities, security, and advanced cloud services
- Demystifying Generative AI - Amazon Web Services (AWS)
- Computer & Network Hardware - AWS Training and Certifications
